

With our passion for Linux, we have been supporting exciting and innovative projects for well-known customers in the industrial environment every day for over 20 years. With us, you are always at the forefront of technology. Our employees are our success, so we value your personal contribution and always have an open ear for you. With us, you have a high degree of individual freedom and the opportunity for co-determination. Whether part-time, full-time or mobile office, we give you the freedom you need to balance your private and professional life and to realize your personal life model. We continue to grow and are looking for you to join our team as

Embedded Linux and Linux Kernel Developer (m/f/d)

Your tasks and responsibilities at Linutronix:

As a software developer, you support our customers from the conception to the series product in the embedded Linux environment. Your field of work is challenging and varied - ranging from error analysis at the customer to the complete BSP with hypervisor support and container deployment, exciting tasks are waiting for you.

You fit in well with us if you can bring the following to the job:

- ☐ University degree in the field of computer science or comparable training
- ☐ Profound knowledge of the realtime operating system Linux in the embedded area as well as in the programming language C / C++
- ☐ Technical experience with software and agile development processes
- ☐ Proficient experience in software development (web, Linux, C / C++)
- ☐ Experienced in the project management process
- ☐ Strong commitment to Open Source
- ☐ Powerful communication skills, initiative and a structured way of working
- ☐ Good command of German and English language

This is what we offer you:

- ☐ A respectful working atmosphere with an open corporate culture and flat hierarchies
- ☐ Exciting projects and customers
- ☐ Innovative technologies
- ☐ Large scope for creativity and personal responsibility
- ☐ Flexible working hours, mobile or hybrid office and part-time options
- ☐ Regular team events such as lunch cooking sessions
- ☐ Company pension allowance and capital-forming benefits
- ☐ Annual training budget
