# Our **LINUTRONIX** job offer

L I N U X F O R I N D U S T R Y

With our passion for Linux, we have been supporting exciting and innovative projects for well-known customers in the industrial environment every day for over 20 years. With us, you are always at the forefront of technology.

Our employees are our success, so we value your personal contribution and always have an open ear for you. With us, you have a high degree of individual freedom and the opportunity for co-determination. Whether part-time, full-time or mobile office, we give you the freedom you need to balance your private and professional life and to realize your personal life model.

We continue to grow and are looking for you to join our team as

## Bachelorand / Masterand (m/f/d)

### **THIS IS WHAT WAITS FOR YOU AT LINUTRONIX:**

We offer you the opportunity to write your thesis in the field of electrical engineering, computer science, embedded design or similar. We are ready to help you with the definition of the subject.

### **YOUR FIELD OF ACTIVITY:**

- ▣ Continued development of build and test automation for Embedded Linux
- ▣ Development of dashboards to visualize the test results
- ▣ Further development of zero-touch onboarding of OPC UA devices and visualization of device status (local and remote)
- ▣ Development of intuitive graphical user interfaces (HMI) based on Q for the configuration of OPC UA devices
- ▣ Integration of embedded systems into IoT systems / cloud solutions
- ▣ Advancing modern OTA systems and the associated management software
- ▣ Good command of German and English language

### **THIS IS WHAT WE OFFER YOU:**

- ▣ A respectful working atmosphere with an open corporate culture and flat hierarchies
- ▣ Exciting projects and customers
- ▣ Innovative technologies
- ▣ Large scope for creativity and personal responsibility
- ▣ Flexible working hours, mobile or hybrid office and part-time options
- ▣ Company pension allowance and capital-forming benefits
- ▣ Annual training budget
