Our LINUTRONIX job offer
LINUX FOR INDUSTRY

With our passion for Linux, we have been supporting exciting and innovative projects for well-known customers in the industrial environment every day for over 20 years. With us, you are always at the forefront of technology.

Our employees are our success, so we value your personal contribution and always have an open ear for you. With us, you have a high degree of individual freedom and the opportunity for co-determination. Whether part-time, full-time or mobile office, we give you the freedom you need to balance your private and professional life and to realize your personal life model.

We continue to grow and are looking for you to join our team as

Working Student (m/f/d)

THIS IS WHAT WAITS FOR YOU AT LINUTRONIX:
Being involved in exciting projects gives you the opportunity to gain professional experience and make interesting contacts while you are still studying.

YOUR FIELD OF ACTIVITY:
- Contribution to build and test automation for embedded Linux
- Contribute to the integration of dashboards for the visualization of test results
- Contribute to the ongoing development of the open OPC UA stack

YOUR PROFILE:
- Studying electrical engineering, computer science, embedded design or similar
- Proactive, communication and teamwork skills
- Profound knowledge of German and English

THIS IS WHAT WE OFFER YOU:
- A respectful working atmosphere with an open corporate culture and flat hierarchies
- Exciting projects and customers
- Innovative technologies
- Large scope for creativity and personal responsibility
- Flexible working hours, mobile or hybrid office and part-time options
- Company pension allowance and capital-forming benefits
- EAnnual training budget
